

6. Lost In Space

3 minutes twenty five seconds and counting we're still go at this time we'll be coming up with the automatic sequence in another 15 seconds from this time all still go at this time

Planet Earth has been possessed

I've had enough of this mess

Stowaway on a shuttle craft, this life raft

Signal return, fuel cells ready to burn

Everything begins to shake

So loud I can't hear my heart break

Ay ay ay

Lost in space, my heart aches

Can't replace the image of your face

Ay ay ay (I'm floating now) (I'm happy now)

Looking down on the world

What do I do with myself?

Day and night at the same time

It's midnight and sunset

D minus 15 seconds to travel internal 12, 11, 10, 9, ignition sequence starts 6, 5, 4, 3, 2, 1, zero all engines running

Lost in space, my heart aches

Can't replace the image of your face

Ay ay ay
